

## European Cardiac Resynchronization Therapy (CRT) survey II registry

Doris Abbühl, Peter Ammann, Irene Schneider

It`s a snapshot survey initiated by the European Heart Rhythm Association and the Heart Failure Association, which is designed to describe clinical practice regarding implantation of CRT devices in a broad sample of hospitals. The clinical and demographic data collected should reflect current patient selection, implantation, and follow-up practice and provide information relevant for assessing healthcare resource utilization in connection with CRT.

<b>type of project</b>	clinical studies
<b>status</b>	ongoing - follow up
<b>start of project</b>	2015
<b>end of project</b>	2016
<b>responsible person</b>	Prof. Dr. Peter Ammann
