

Predictive markers for checkpoint-based immunotherapy in advanced non-small cell lung cancer

Maximilian Bösch, Florent Baty, Martin Brutsche, Martin Früh, Markus Joerger

The aim of this study is to elucidate a novel biomarker constellation with superior predictive value for PD-1/PD-L1-targeted immunotherapy in advanced non-small cell lung cancer.

type of project	fundamental research
status	ongoing - recruiting phase
start of project	2020
end of project	2021
project manager	PD Dr. Maximilian Bösch
