Predictive value of mucinous histology in colon cancer: a population-based, propensity  

tumor cells in stage I & II colon cancer patients are associated with significantly worse  
disease-free and overall survival. BMC Cancer 2016; 16:106.

Tarantino I, Beutner U. Does caffeine reduce postoperative bowel paralysis after elective  
laparoscopic colectomy? (CaCo trial): study protocol for a randomized controlled trial.  
Trials 2016; 17:186.

Warschkow R, Cerny T, Schmied B M, Güller U, Thürlimann B, Joerger M. A population-based  
analysis of secondary malignancies in breast cancer patients receiving breast  

surgery after emergency presentation for colorectal cancer has no impact on overall and  

colon occlusion reduces peritoneal contamination during a transrectal NOTES procedure: 
a controlled porcine survival study. Surg Endosc 2015;.

Warschkow R, Gueller U, Tarantino I, Cerny T, Schmied B M, Thürlimann B, Joerger M.  
Improved Survival After Primary Tumor Surgery in Metastatic Breast Cancer: A Propensity-  

Relevance of Mucinous Subtype in a Population-based Propensity Score Analysis of  

Gueller U, Tarantino I, Cerny T, Ulrich A, Schmied B M, Warschkw R. Revisiting a dogma: similar survival of patients with small bowel and gastric GIST. A population-based propensity score SEER analysis. Gastric Cancer 2015;.

Müller-Stich B P, Brändle M, Binet I, Warschkow R, Clerici T. To autotransplant simultaneously or not -- can intraoperative parathyroid hormone monitoring reliably predict early postoperative parathyroid hormone levels after total parathyroidectomy for hyperplasia?. Surgery 2007; 142:47-56.
